History. The first electric motor was invented in 1821 by Michael Faraday. The motor was developed only a year after Hans Christian Årsted discovered that the flow of electric current creates a proportional magnetic field. This early motor was simply a wire partially submerged into a glass of mercury with a magnet at the bottom.

The success of molecular modeling and computational chemistry efforts are, by definition, dependent on

quality software applications. Open source software development provides many advantages to users of modeling applications, not the least of which is that the software is free and completely extendable.
