The Fluvial Design Guide is aimed at professional staff engaged in the design process from the early stages of looking at alternative solutions through to the delivery of the outputs of design for the construction, maintenance, refurbishment or alteration of flood defence or land drainage assets. The guide is thus intended to be used by both designers and asset managers.

Fluvial Design Guide - Environment Agency

The Office of Hydraulics and Stormwater Design emphasizes stewardship of California's water resources by providing: Development and maintenance of guidance and state-of-the-practice information for departmental staff to promote uniformity and consistency in the design of roadway drainage-related features.

Hydraulics & Stormwater Design - Caltrans

Keyline design is a landscaping technique of maximizing the beneficial use of the water resources of a tract of land. The "keyline" denominates a specific topographic feature related to the natural flow of water on the tract. Keyline design is a system of principles and techniques of developing rural and urban landscapes to optimize use of their water resources.

Proper roof slope and drainage are important to prevent excessive water accumulation by Jason P. Wilen, AIA, CDT, RRO onding water sometimes occurs on membrane roof systems as a result of snow, rainfall or

Proper roof slope and drainage are important to prevent

Design (as a verb: to design) is the intentional creation of a plan or specification for the construction of an object or system or for the implementation of an activity or process.. Design (as a noun: a design) can refer to such a plan or specification (e.g. a drawing or other document) or to the created object, etc., and features of it such as aesthetic, functional, economic or socio-political.
