Comparative psychology refers to the scientific study of the behavior and mental processes of non-human animals, especially as these relate to the phylogenetic history, adaptive significance, and development of behavior. Research in this area addresses many different issues, uses many different methods and explores the behavior of many different species from insects to primates.

The field of psychology commonly uses experimental methods in what is known as experimental psychology. Researchers design experiments to test specific hypotheses (the deductive approach), or to evaluate functional relationships (the inductive approach).. The method of experimentation involves an experimenter changing some influence—the independent variable(IV)—on the research subjects ...
