electricity, uranium is also a non-renewable energy resource. This means that it is a resource that is in limited supply and could eventually be completely used up. non-renewable energy resource: a source of energy that could eventually be used up NEL 9.2 Conventional Energy Sources 63

9.2 Conventional Energy Sources - Mr. Denney's Webpage

Conventional energy directly mean the energy source which is fixed in nature like oil, gas and coal. In other words conventional energy is also termed as non-renewable energy sources. Their use leads to increased greenhouse gas emissions and other environmental damage.

What is conventional energy? - Quora

ENERGY RESOURCES Today the greatest attention in the world is devoted to energy resources because their use is usually irreversible, but the supplies of traditional fossil fuels (oil, natural gas) are running out fast. This is why over the last decades attention is focused on renewable energy resources and ways to increase energy efficiency.
