The aim of Structural Analysis of Kashmiri folktales is to test V J. Propp's morphological- structural approach by applying it to Kashmiri folktales. The author bases the study on J. Hinten Knowles's work The Fol-Tales of Kashmir (London, 1893), which can be used to apply Propp's theory as it contains every kind of narrative type.

Structural modeling is a tool to establish three mathematical models, including (1) a structural model consisting of three basic components: structural members or components, joints (nodes, connecting edges or surfaces), and boundary conditions (supports and foundations); (2) a material model; and (3) a load model.

CHAPTER 4 - STRUCTURAL MODELING AND ANALYSIS

6.7 Analysis of Trusses: Method of Sections. The method of joints is good if we have to find the internal forces in all the truss members. In situations where we need to find the internal forces only in a few specific members of a truss, the method of sections is more appropriate.

The ability to "see" and interpret structural behaviour is a core ability of a structural engineer. At the initial stage of a structural scheme design, we are not interested in numbers, or amounts, only the sense of a load effect.
