Policy Driven Data Center Design

control policies either drop data or force the sender to pause. When the data sender is sensing the physical environment, however, a pause is equivalent to drop-ping data. Instead of arbitrarily dropping data that may contain important events, we present a policy-driven data dissemination service named PACK, based

Policy-Driven Data Dissemination for Context-Aware

Use policies and Ciscoâ€™ ACI to make data centers more flexible and configurableâ€”and deliver far more business value Using the policy driven data center approach, networking professionals can accelerate and simplify changes to the data center, construction of cloud infrastructure, and delivery of new applications.
